

Serial No: 1

Name: CNC Cutting center with wireless measurement of

depression bar

Model: Turquoise 350R

Turquoise 350R - Specialized for Cutting Glazing Beads in Aluminum Alloy Windows and Doors

Type 1:90°cut, Type 2:Arbitrary angle cut Range = +22.5°- 157.5°

User-Friendly Operation:

Features wireless measurement and automatic data transmission for precise CNC-based sizing. Cuts glazing beads to the required dimensions in one step, eliminating the need for additional trimming.

High Precision:

Equipped with a handheld wireless measuring device for real-time bead size measurement and a high-precision spindle saw blade motor, achieving a processing accuracy of 0.1mm.

High Efficiency:

Saves the need for an experienced craftsman, doubling the efficiency compared to traditional cutting methods.

Unique Chip Removal Design:

Includes a waste collection box, ensuring a cleaner workspace.

Tool Management and Maintenance:

Comes standard with a tool life management system and automatic maintenance reminder function.

Product Information

Serial No: 1

Name: CNC Cutting center with wireless measurement of

depression bar

Model: Turquoise 350R

Serial No: 1

Name: CNC Cutting center with wireless measurement of

depression bar

Model: Turquoise 350R

Machining Specifications	Parameter Value
Saw Blade Size	ø350×3.2×ø25 Z=100
Profile size	Square tube: 70 × 70mm Rectangular tube: 80 × 70mm
Saw blade speed	2800 r/min
Motor Power	1.3KW
Bluetooth Measuring Tape Parameters	Parameter Value
Fixed-Length Range	0-3000mm
Measuring Range	125-2500mm
Positioning Speed	Positioning Speed: 1 m/s
Measurement Accuracy	0.1 mm
General Parameters	Parameter Value
Power supply	Parameter Value 380V/50Hz
Power supply	380V/50Hz
Power supply Power	380V/50Hz 3.0kw
Power supply Power Pressure	380V/50Hz 3.0kw 0.5~0.8MPa
